

Avocet Electrostatic Pinning Bands.

Avocet Precision Pinning Band

Smooth/consistent edge preventing sparking and streamers

(SEM Image of Avocet Precision Pinning Band)

Avocet's Bespoke Manufacturing Method Enables:

- Increased line and casting speeds.
- Uniform, consistent profile dramatically reducing streamers and sparks.
- High mechanical strength.
- Seamless blade adjustment capabilities.
- Precise geometry allowing for film control and stability.
- Adaptable to all existing BOPET film lines.
- Low relative cost.
- Thickness of band is 0.05mm (+/-0.0025) x widths up to 12mm but can tailor to customer requirements.
- Supplied in lengths up to 560 meters
